

Sometime needs to be done to reduce or eliminate the number of phone calls that telemarketers make to the personal home phone numbers.

Right now 75% to 100% of the daily phone calls are from telemarketers, it is getting to the point that I don't even want to answer the phone during the day because it is a telemarketer. The computerized calls must be eliminated because there is no way to tell the computer to put you on the no call list. The computerized multi dialing thing must also be eliminated because you answer the phone and no one is on the other end, and then you get another call 10 to 30 seconds later until you are the first person to answer out of the group dialing, some times they end up calling back anywhere from 3 to 4 times. I have never got a telemarketing call on my cell phone yet but there must be some laws created to never ever let that happen, it is bad enough that home phones are almost rendered useless and we don't need that to happen to cell phones. If the FCC would make a nation wide no call list to eliminate the telemarketer calls, that would be great, I would even pay a few bucks a year to keep it afloat. When the no call list gets somewhere around 75% of all phone numbers, there needs to be a new law passed to totally eliminate the telemarketing call. Because I'm sure it's not going to be a question of when the list gets that big, but if the list ever gets created.

PLEASE CREATE A NATION WIDE NO CALL LIST, IT IS NEEDED REALLY BAD!!!!!!!
